DOCUMENT MANAGEMENT SYSTEM AND METHOD
USING CONTENT GROUPING SYSTEM

Abstract of the Disclosure

5   A method of distributing a plurality of documents includes associating a metadata file with each of the documents, applying a content attribute to each of the documents and appending the metadata file of each of the documents with the content attribute, and assigning a content group to each of the documents based on the content attribute of a respective one of the documents and

10   modifying the metadata file of each of the documents to include the content group of the respective one of the documents. In addition, the method further includes defining a plurality of content categories and associating the content group with at least one of the content categories, and distributing for the at least one of the content categories each of the documents assigned the content group.
